

Whiteboard Sketches

A series of high-level, whiteboard sketches (proof-of-concept (POC) / blue sky / ideation) created during the 1-analysis / 2-architecture phases of an existing Web-based application to be converted to a phone / tablet app.

Aspects of this work can be seen in the POC for the MyTrials Next Generation project in my portfolio.

This product's redesign was passed to a co-worker after my initial contribution and was taken further into mockups and user flows.
